Workshop Topics

Papers in all areas of human language technology are encouraged to be submitted, with emphasis placed on:

- automatic speech recognition and understanding technology
- speech to text systems
- spoken dialog systems
- multilingual language processing
- robustness in ASR
- spoken document retrieval
- speech-to-speech translation
- spontaneous speech processing
- speech summarization, and
- new applications of ASR.

Submissions for the Technical Program

The workshop program will consist of invited lectures, oral and poster presentations, and panel discussions. Prospective authors are invited to submit full-length, 4-6 page papers, including figures and references, to the ASRU 2007 website. All papers will be handled and reviewed electronically. The website will provide you with further details. There is also a demonstration session, which has become another highlight of the ASRU workshop. Demonstration proposals will be handled separately. Please note that the submission dates for papers are strict deadlines.
